

New Services Available to Support Patient Engagement

Kia Ora! Mahitahi Hauora PHE has worked with Vensa to provide support/funding for your patient communications through TXT2Remind. Through this new agreement Vensa can supply your patient messaging for communications around COVID, appointments, immunisations, Smoking Brief Advice...and so much more!

Benefits of TXT2Remind:

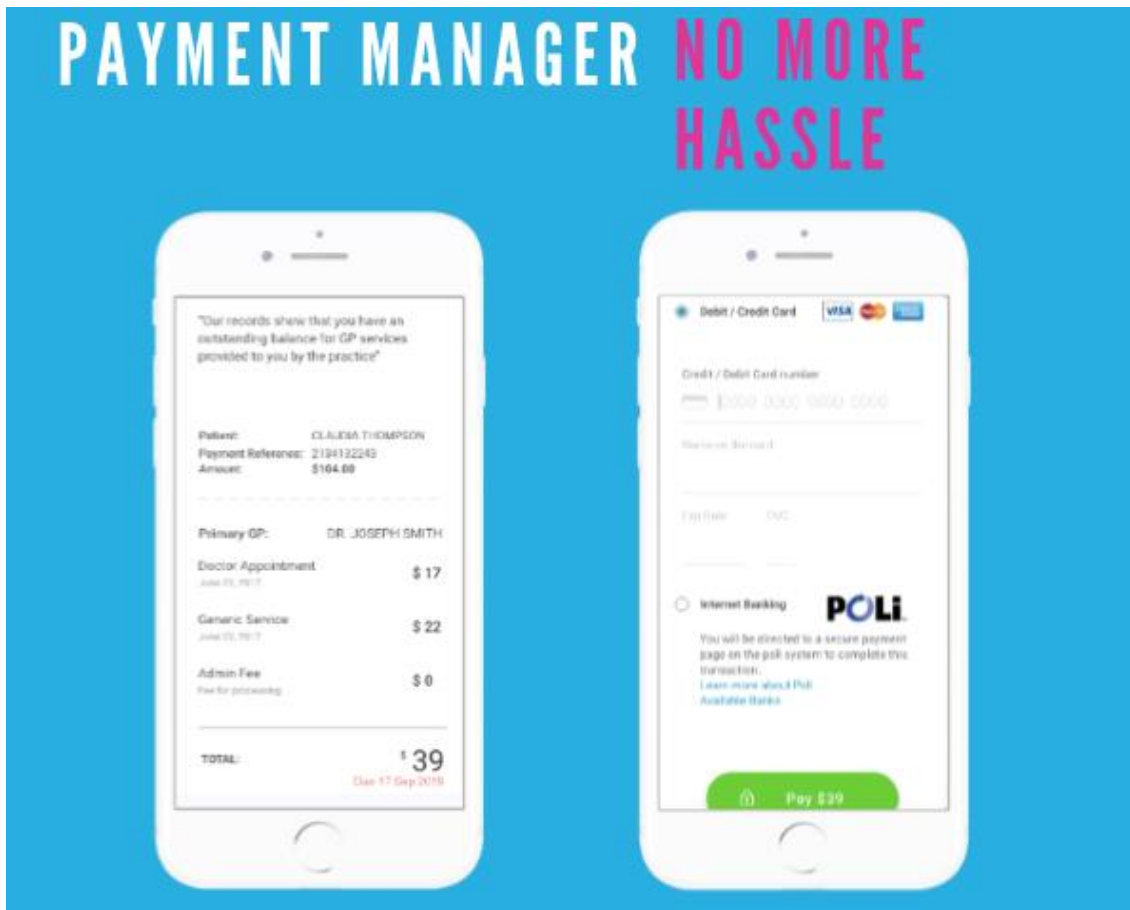

- **Automated services** that save reception and clinicians time. We can deliver Smoking Brief Advice to eligible patients automatically with Read-Code updates. Click [HERE](#) to learn more.
- Assists in mass communications for important public health outreach such as COVID, MEN-W, Measles, etc.
- Appointment reminders that have colour-coding for confirmations and cancellations. You are better able to keep track of cancellations the day before and book in.
- Supports patient outreach for lab results, repeat script requests, recalls, and accounts. The system has built-in payment options through bank-to-bank transfers or debit/credit card payments.

The Vensa Team can get you started today with funded services, just complete the attached form and submit or email to Sarah Zub (szub@vensa.com). She will be in touch to arrange installation and training.

Do you already use TXT2Remind?

We have NEW services that can help automate Smoking Brief Advice and Debt Management that are included in your service.

Benefits of Bulk Invoicing and Payment Platform

- Supports service delivery: **in-person, telephone & virtual consultations** and can substitute for payment terminals at the clinic for optimal infection control.
- Allows **patients to conveniently pay** for current or outstanding balances with online payments.
- Designed for patient ease and **takes less than 1 minute** to pay with their debit/credit card or PoLi (bank to bank transfers).
- Payment is automatically collected and the **invoice reconciled** in your PMS.
- Email receipt goes to the patient. Voila!
